

## Profile

Experienced Flutter Developer with 3+ years of hands-on expertise in building high-performance, cross-platform mobile applications. Proficient in Dart and advanced state management solutions such as GetX, BLoC, Riverpod and other state Managements with a strong ability to design and implement scalable architectures. Skilled in API integration, Method Channels for seamless native communication, and delivering pixel-perfect UI/UX aligned with modern design principles. Adept at testing, debugging, and performance optimization to ensure smooth and reliable app experiences. Known for writing clean, maintainable, and reusable code while thriving in fast-paced, dynamic environments to deliver business-focused mobile solutions.

## Top Skills

Flutter • Dart • Core Java • Python • Vs Code • Android Studio • Jira • Trello • Bitbucket • GitHub • MongoDB

## Work Experience

Appscrip  
Flutter Developer

March 2023 - Present  
Mohali, Punjab

- **Reduced app load time by 50%** through advanced performance optimizations, enhancing speed and reliability across platforms.
- **Designed and implemented scalable architectures** for large-scale mobile and web applications, improving maintainability and long-term code quality.
- **Improved user experience (UX)** by optimizing UI flows and responsiveness, resulting in a **30% increase in user engagement** across multiple applications.
- **Enhanced app scalability and backend efficiency**, enabling **30% growth in active user base** through optimized API integrations and data handling.
- **Accelerated development lifecycle by 25%** by adopting **Agile methodologies, CI/CD pipelines, and automation tools**, reducing time-to-market.
- **Integrated native features using Flutter Method Channels**, bridging platform-specific APIs to deliver advanced functionalities in Android and iOS apps.
- **Collaborated cross-functionally with designers, QA, and backend teams**, ensuring seamless delivery of high-quality, production-ready apps.

- **Implemented state management solutions (BLoC, GetX & RiverPod)** to deliver **clean, maintainable, and scalable** codebases.
- **Conducted unit, widget, and integration testing**, achieving higher test coverage and ensuring app stability before release.
- **Mentored junior developers and conducted code reviews**, improving team productivity, knowledge sharing, and overall code quality.

## Projects

- ❖ **Urbuyr**: A real Estate app use to buy sell property and have section for agent's vendors and lenders.  
([PlayStore](#)) ([AppStore](#))
- ❖ **Find A pro**: A Social App used to book a professional of any profession and from provider side pro receives a call in real time using Mqtt and push kit ([AppStore](#))
- ❖ **LeOffer**:An E-commerce app have an option to sell and buy product and a section for chat between users  
([PlayStore](#)) ([AppStore](#))
- ❖ **TrulyFree** :An E-commerce shopping app with functionalities like social feeds, reels, influencers  
([PlayStore](#)) ([AppStore](#))
- ❖ **Mealoa**: An E-commerce app have an option to sell and buy product worked on payment gateway only in this app

## Education

### B-Tech computer science

Adesh institute of engineering and technology
